### **DETAILED ACTION**

Applicants' response, which included amendment to claim 1, filed on 12/18/2003, is made of record.

In view of applicants' response, particularly amendment to claim 1, 112 first paragraph rejections made in the previous office action have been obviated. As for applicants comment that examiner is reading the limitation of the specification into claims is incorrect. Applicants have provided two declarations to rebut the 103 rejection. Examiner had made the prosecution/examination history clear by pointed out that in one hand applicants were claiming unexpected superior properties based on solubility and color but permit such groups in the genus of triazine compound that would contradict that these properties are essential. As for second remarks regarding examples, the point examiner was making related to UV redshift and the compounds made including the examples pointed out does not bring out the point that any group would behave the same way especially pointed out by the examiner.

Claims 1-11 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 12-19 directed to composition and method of using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 12-19 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 2 is hereby withdrawn.

Claims 1-19 are pending.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The triazine compound of formula I as shown in claim1, bearing a  $\beta$ -naphthol group with specific  $Ar_1$ , ZT,  $R_1$ ,  $YR_2$ ,  $R_3$ ,  $R_4$ ,  $R_5$ ,  $R_6$ , and  $R_7$  groups, composition and method of use as UV stabilizer as embraced herein was not found to be anticipated or rendered obvious by the prior art of record. Additional search in the related art area also did not yield any prior art disclosing the triazine compound of formula I, bearing a  $\beta$ -naphthol group with specific  $Ar_1$ , ZT,  $R_1$ ,  $YR_2$ ,  $R_3$ ,  $R_4$ ,  $R_5$ ,  $R_6$ , and  $R_7$  groups, composition and method of use as UV stabilizer embraced in the instant claims. Therefore, the examiner noted that the claims 1-19 would be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
